Abstract for "Find Your Passion" Web Application:

- 1. Title: "Find Your Passion"
- 2. Objective: Assist users in discovering their passions through personalized interactions and guidance facilitated by AI technology.
- 3. Technology Stack: MERN (MongoDB, Express.js, React.js, Node.js) stack with ChatGPT AI integration.
- 4. Key Features:
 - Personalized conversations with ChatGPT AI.
 - Curated recommendations based on user preferences.
 - Dynamic user interface for seamless navigation and engagement.
- 5. Impact: Empower users to embark on a journey of self-discovery and personal fulfillment, fostering a supportive community focused on passion exploration and fulfillment.

Abstract for Blood Donor and Blood Bank Management System:

- 1. Title: Blood Donor and Blood Bank Management System
- 2. Objective: Connect donors, blood banks, and individuals in need for streamlined blood donation processes.
- 3. Technology Stack: MERN (MongoDB, Express.js, React.js, Node.js) stack.
- 4. Key Features:
 - Real-time blood inventory updates.
 - Appointment scheduling and blood requests.
 - Geolocation integration for efficient coordination.
 - Secure user authentication and notifications.
- 5. Impact: Enhance blood donation processes, save lives, and promote community health.

Abstract for Sports Hub Web Application:

- 1. Title: Sports Hub Web Application
- 2. Objective: Facilitate event organization and participation within college communities.
- 3. Key Features:
 - User profiles and authentication.
 - Event posting and management.
 - Event discovery and search.
 - RSVP and attendance tracking.
 - Discussion forums and community engagement.
- 4. Impact: Promote sports participation, community engagement, and overall well-being within college ecosystems.

Abstract for Carpooling Platform:

- 1. Title: Carpooling Platform
- 2. Objective: Reduce traffic congestion and carbon emissions by facilitating ride-sharing.
- 3. Key Features:
 - User authentication.
 - Ride creation and matching algorithm.
 - Real-time chat and booking system.
 - Reviews and ratings, payment integration.
- 4. Impact: Promote sustainable transportation practices, reduce environmental impact, and enhance community connectivity.
